

The 12x12 Pledge

Yes! I am up to the challenge of lowering my electricity consumption 12 percent by the year 2012.

I understand that by reaching this goal, not only will I lower my monthly living expenses by reducing the amount I pay to my utility, I'm doing the world a favor by reducing greenhouse gas emissions.

I will establish my base year consumption and I will participate in annual reporting requirements to measure the results of our commitment.

I will support my co-workers and my company in their efforts.

I will celebrate in 2012 when we've reached our goal!
